

## ASPHALTICA AND OIL&NONOIL TEAM UP 24-26 NOVEMBER 2021

**“Smart roads to the future” - For the first time, Veronafiere brings together the entire supply chain dedicated to the world of roads**

**Verona, 7 April 2021-** A new exhibition event dedicated entirely to the road supply chain will make its debut in 2021: from infrastructures to fuel distribution and mobility services. **Wednesday 24-Friday 26 November** will welcome **Asphaltica** and **Oil&nonOil** held simultaneously at the Verona Exhibition Centre. Two exhibitions, both landmarks in their respective sectors, are on the calendar together for the first time in Verona with the aim of creating new synergies and expanding and completing the product offering.

*“The two events,”* said **Giovanni Mantovani**, CEO of Veronafiere, *“have always represented similar and complementary sectors and bringing them together on the same dates will ensure added value for companies and operators thanks to new business opportunities. This is a new show offering that we are keen to develop further with the creation of a full-scale national reference hub for the future of smart roads.”*

**Asphaltica** today is the main exhibition in Italy for technologies and solutions for road paving, safety and infrastructures. It is organized by Veronafiere in partnership with **SITEB-Italian Roads and Bitumen**, the association that brings together Italian companies in the sector.

In 2021, Asphaltica will be flanked by **Oil&nonOil**, an exhibition that brought the world of fuel distribution, storage networks and service stations to Veronafiere in 2012, with a look at the future of new sources of energy and alternative mobility.

Originally scheduled earlier this year as an exhibition-conference in Rome, this edition of Oil&nonOil will now take place at Verona Exhibition Centre: an ideal solution to ensure maximum safety for exhibitors and visitors.

The two events in November will be attended in-person. This is thanks to the **safe business protocols** implemented by Veronafiere and validated by the technical-scientific committee, health authorities and Aefi (the national association of trade fair organizers), and already successfully tested during Oil&nonOil 2020.

Exhibition stands, machinery and equipment will be located in the modern **Halls 11 and 12** at Veronafiere, with access through the “Re Teodorico” Gate, complete with all the new facilities and recent redevelopment.
